Warriapendi Primary School - Classroom Behaviour Management

Have you noticed the Targeted Behaviour chart in your child’s classroom? This chart is used to manage behaviour from Kindergarten – Year six.

The “Targeted Behaviours” is a simple classroom behaviour management system that uses the levels of Behaviour framework. Teachers work with their students to construct a visual map of acceptable behaviours and consequences.

The teachers and students jointly review descriptors of specific behaviours and place the behaviour descriptors into either the acceptable or unacceptable category. With teacher guidance leading the student discussion, all acceptable behaviours are placed into the green section of the chart. Unacceptable behaviours are categorised as minor, moderate or severe.

Since this behaviour management system has been jointly constructed by students and teachers at Warriapendi Primary School, it has proven to be very successful due to clear classroom expectations and consequences.
